Folders Created

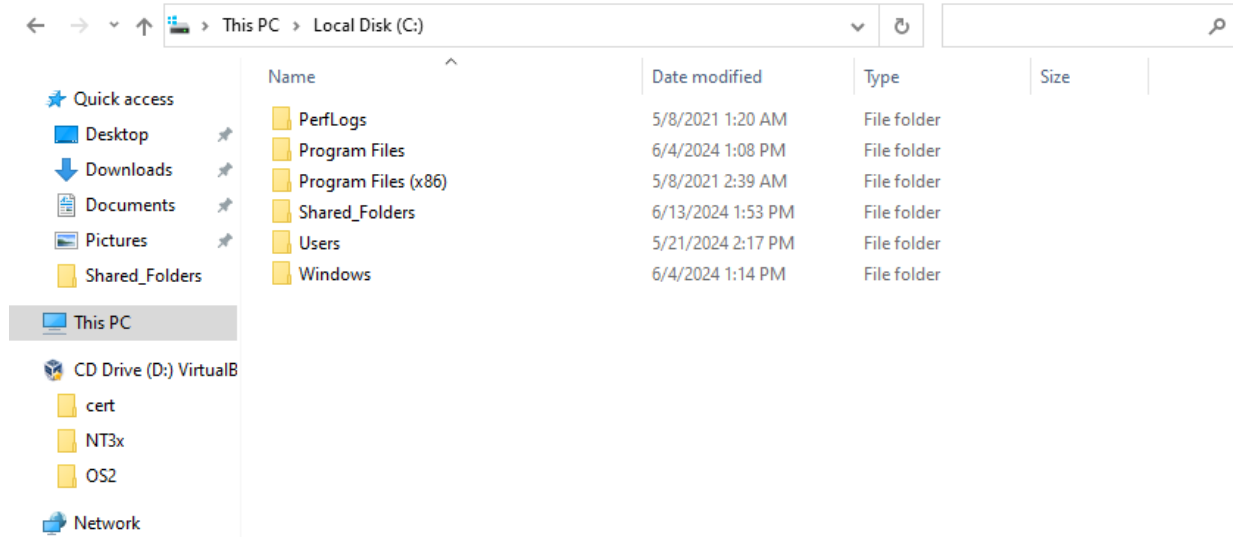

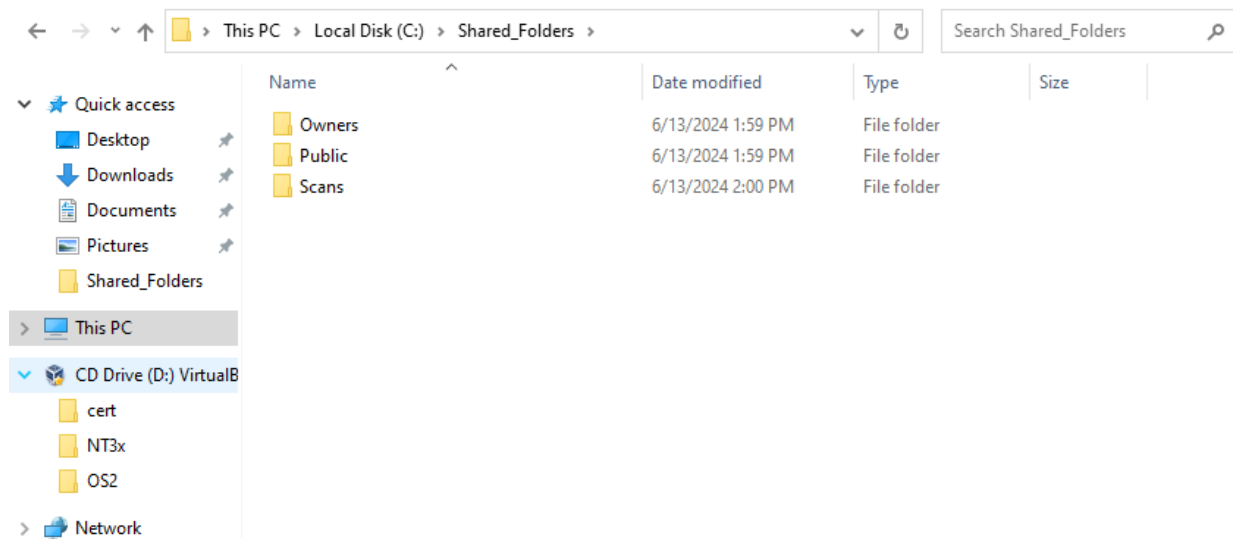

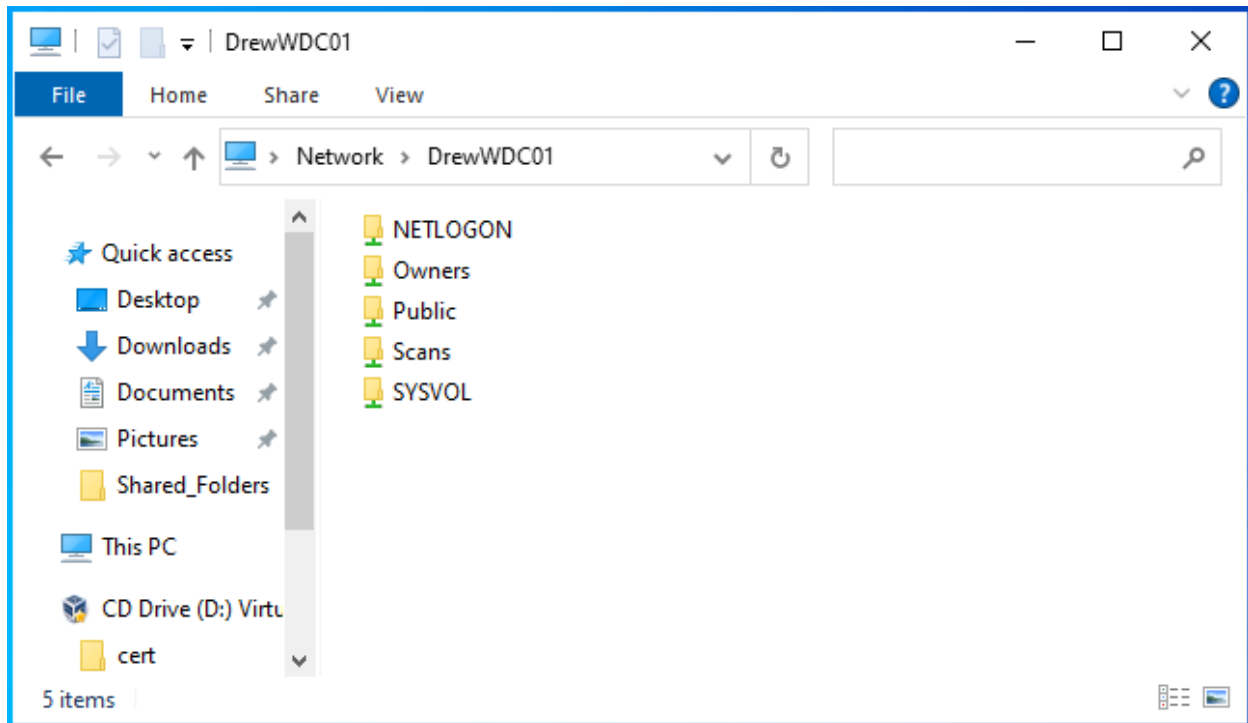

This screenshot shows the Shared_Folders folder created inside the C Drive.

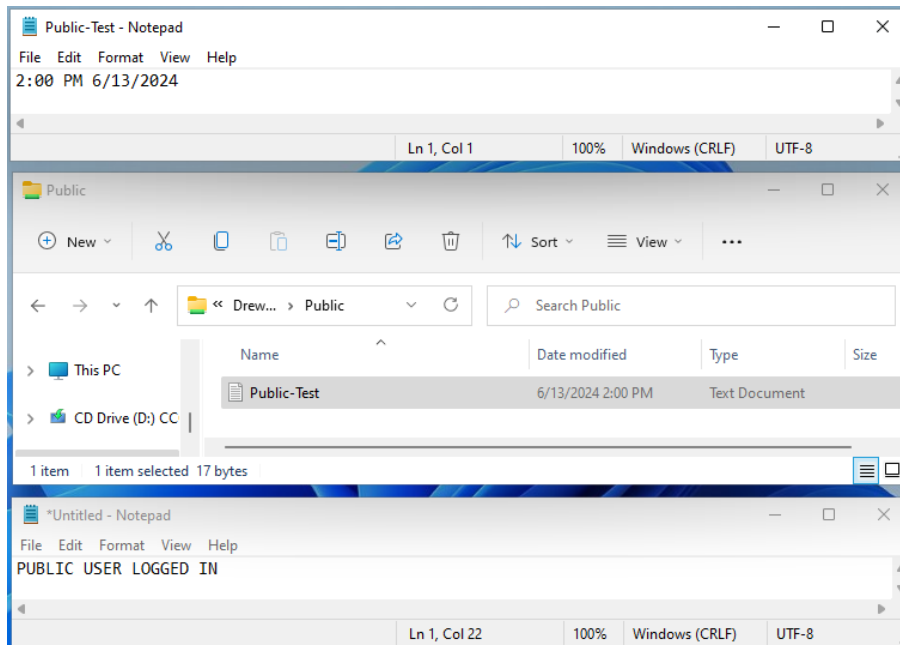

This screenshot shows the three folders to be shared placed inside the Shared_Folders folder.
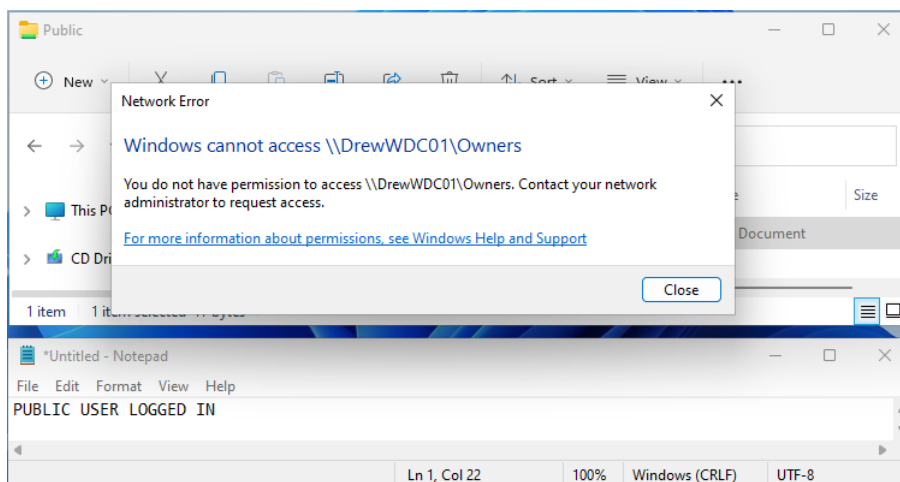

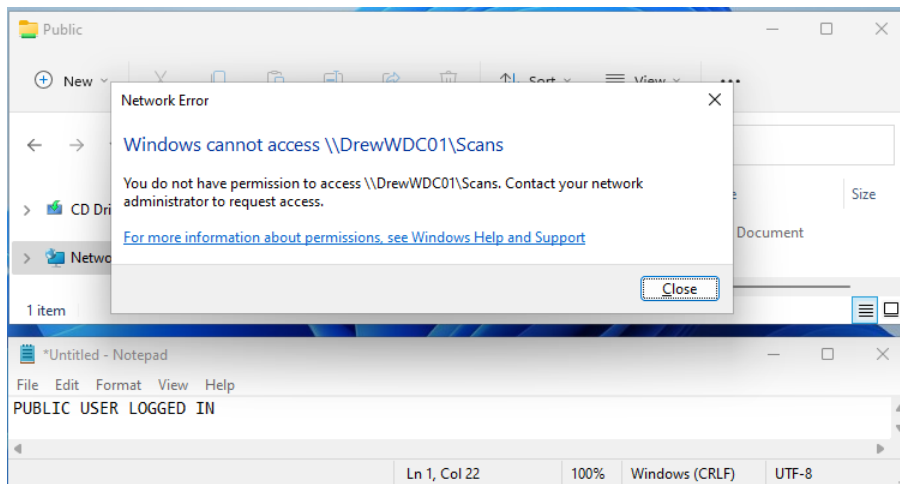

Folders Shared

This screenshot shows that the folders are shared out over the network, without sharing their parent folder.
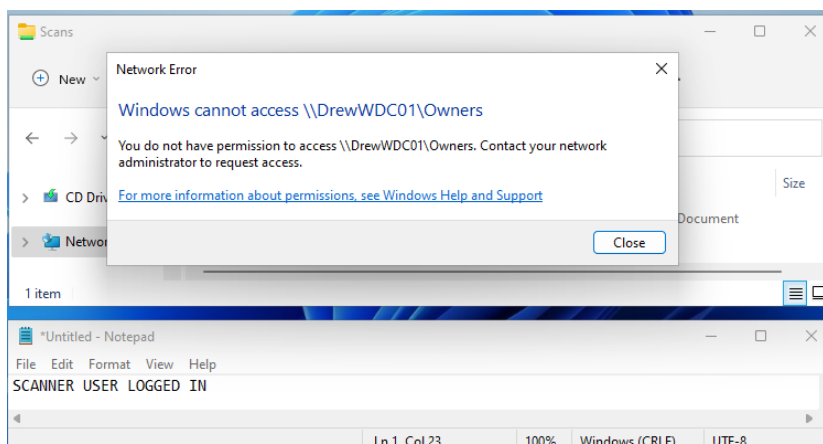

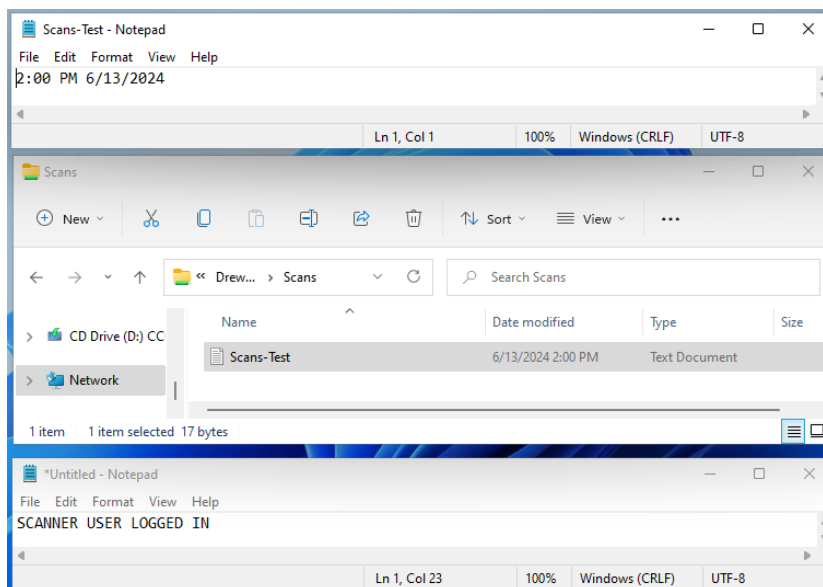

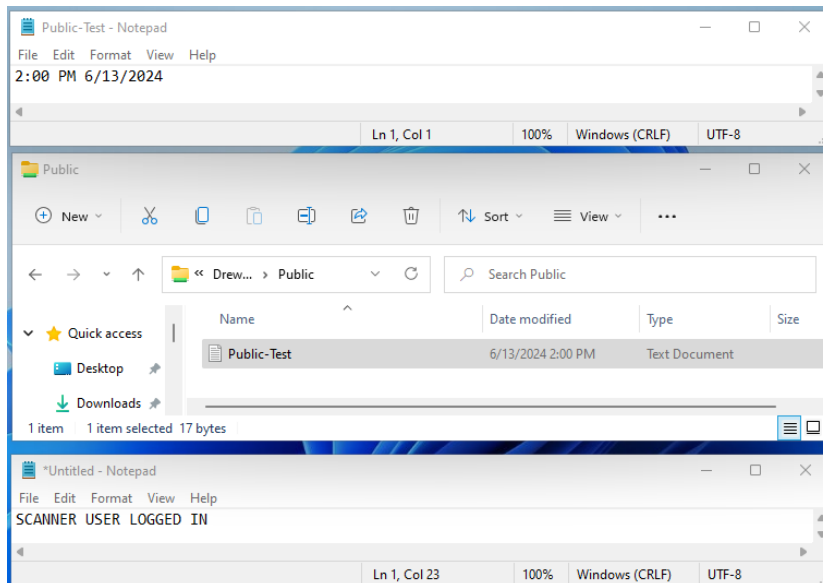

Public User

These screenshots show the public user attempting to access the three shared folders. They are able to access the file within the *Public* folder, but they are unable to access the *Scans* and *Owners* folders.

Scanner User

These screenshots show the scanner user attempting to access the three shared folders. They are able to access the files within the *Public* and *Scans* folders, but they are unable to access the *Owners* folder.

Partner User

These screenshots show the partner user attempting to access the three shared folders. They are able to access the files in all three folders.
